smell & taste the heritage

Kaukou Honeybush Tea

Honeybush is indigenous and proudly South African that naturally grows on southern slope farmland in the Garden Route. It is a natural ingredient emanating from the rich biodiversity of our Cape Floral Kingdom. The indigenous Khoikhoi used the honeybush shrub to make a medicinal tea with a pleasant, mildly sweet taste and aroma.

Honeybush is a herbal tea that is caffeine-free with high antioxidants and low tannins. Kaukou Honeybush Tea is organically certified and is non-genetically modified. Our Herold Meander farm is owned and managed by descendants of the indigenous community.

Kaukou Honeybush Products

Kaukou Honeybush Tea is available in the following ranges:

- Bulk original loose leaf honeybush tea sold per kg.
- Bulk green loose leaf honeybush tea sold per kg.
